JRMT sectional temperature controller

Structure characters

High quality bimetal is the heart of JRMT sectional temperature controller that is with enclosed structure. JRMT can control rang of temperature with a certain current in circuit, so it can be used to substitute some temperature sensors or thermo switches. It is sensitive and easily install

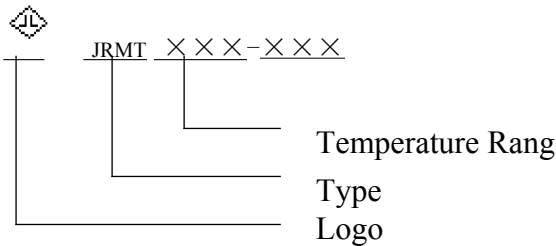

Applications

JRMT sectional temperature controller are not only widely used as water temperature controller in pedestal pan but also as temperature controller in air-condition, training machine, etc.

Parameters

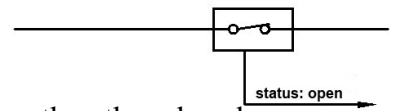

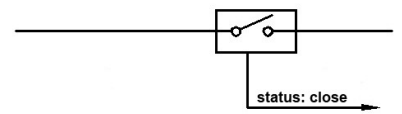

Action temp $-20^{\circ}\text{C} \sim 200^{\circ}\text{C}$ with Tolerance: $\pm 2^{\circ}\text{C} \sim \pm 5^{\circ}\text{C}$
 Used condition: ambient temp of $-20^{\circ}\text{C} \sim 200^{\circ}\text{C}$
 Rated voltage/current: DC24V/3A, AC120V/3A, AC240V/2A
 Endurance: 10000cycles

Marks:

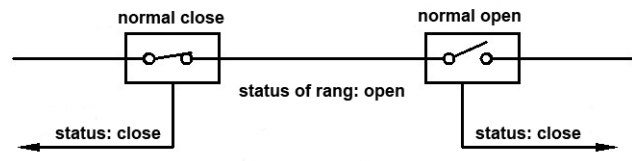

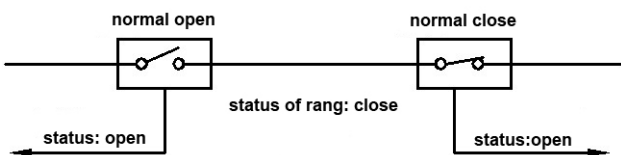

Performance

A) same as normal thermal protector

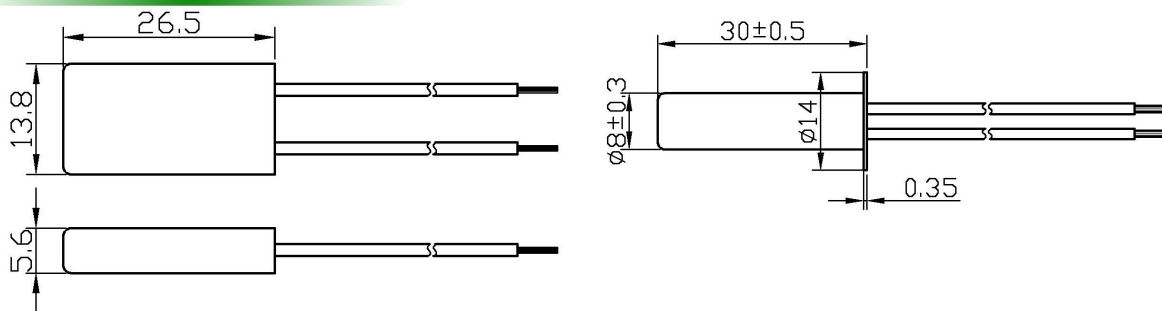

C) Closed in a temperature section, the other open

B) Open in a temperature section, the other closed

Figure

Certification

complying with RoHS
